

**Call for papers:
2027 Annual Conference on
Macroeconomics and Monetary Policy
Federal Reserve Bank of San Francisco**

Dear colleague,

The Federal Reserve Bank of San Francisco is hosting its Annual Conference on Macroeconomics and Monetary Policy in San Francisco on **Friday, March 26, 2027**.

The conference aims to bring together academic and central bank researchers, financial market practitioners, and policymakers. Our objective is to assemble a program of the highest quality and interest.

We invite you and your colleagues to submit research that is approximately at the working paper stage. While the conference focuses on macroeconomics and monetary policy, we are interested in a wide set of fields that help inform an understanding and the achievement of the congressionally mandated goals of maximum employment and stable prices across a broad range of economic conditions. This includes related fields of labor economics, finance, international economics, applied microeconomics, public finance, and others. Both empirical and theoretical submissions are encouraged.

Those interested in presenting research at this conference should send a PDF of their paper to SF.ER.Macroconference@sf.frb.org by **October 26, 2026**. Authors of accepted papers will be notified by November 20, 2026. We are currently planning for an in-person conference to be held in the Federal Reserve Bank of San Francisco. Organizers will cover reasonable travel expenses for presenters of accepted papers and for discussants. Electronic copies of the conference papers will be made available at <http://www.frbsf.org/economic-research/events/>, but a conference volume will not be published.

Please address any questions to SF.ER.Macroconference@sf.frb.org.

Please feel free to circulate this call for papers with your colleagues. We look forward to your participation.

Sincerely,

Huiyu Li, Fernanda Nechio, and Sanjay R. Singh
